# Master of Information Technology (Professional) (Faculty of Sciences) (MPIT) - MIT(Prof)

CRICOS code (International applicants): 030315K

This program is offered only to continuing students. No new admissions will be accepted. Students who are interested in this area should consider the Master of Computing Technology, Master of Computing Technology (Extended).

Program fees

Commonwealth supported place

A Commonwealth supported place is where the Australian Government makes a contribution towards the cost of your higher education and you as a student pay a student contribution amount, which varies depending on the courses undertaken. You are able to calculate the fees for a particular course via the Course Fee Finder. Commonwealth Supported students may be eligible to defer their fees through a Government loan called HECS-HELP.

Domestic full fee paying place

IT requirements

All students are required to have access to the Internet and to a personal computer running Microsoft Windows and Linux. The Department provides assistance with installing Linux for students who may not have done so before.

Students should visit the USQ minimum computing standards to check that their computers are capable of running the appropriate software and versions of Internet web browsers and to check the minimum and recommended standards for software.

Compliance with these recommendations will ensure students receive the computing help needed if experiencing problems.

Macintosh computers are not recommended due to the software used in the courses.

Software is specified on a course-by-course basis and, in some instances, it is provided with the textbook required for the course.

The University has installed a wireless network for students' computers. In order to take advantage of this facility and further enhance their on-campus learning environment, students should consider purchasing a notebook/laptop computer with wireless connectivity. A notebook/laptop may be required for some courses.

Exit points

Students enrolled in this Master's program who wish to exit without completing the program may be awarded the Graduate Diploma of Professional Computing (GDPC) if they have completed at least eight units or the Graduate Certificate in Professional Computing (GCPC) if they have completed at least four units.

Recommended enrolment pattern

There is no recommended enrolment pattern for this program. Students should select their own, using the list provided at http://www.sci.usq.edu.au/courses/ keeping in mind the requirements to graduate outlined above in the Program Structure. If unsure about a suitable enrolment pattern, students should contact the Program Coordinator.
