PSY1101 Critical Thinking	S1 ONC
PSY1020 Foundation Psychology B	S2 ONC
PSY1030 Cross-Cultural and Indigenous Psychology	S2 ONC

IT requirements

Access to high-level computers is necessary as computers play an important role in the studying and learning process, especially in media related fields where digital technology has superseded analogue traditions. Students are strongly encouraged to make use of up-to-date computer technology in a number of ways to facilitate learning, and in the production of assessment material. Some courses require substantial access to a computer because computer software is integral to the material being taught in the course. On-campus students will access appropriately equipped laboratories, but should consider acquisition of their own computer.

Additionally, students are required to purchase an External 7200 rpm Hard Drive with Firewire in their first semester, first year. This hardware will be necessary for use over the duration of the three years (full-time) of the degree course.

The University is installing a wireless network for students' computers. In order to take advantage of this facility and further enhance their on-campus learning environment, students should consider purchasing a notebook/laptop computer with wireless connectivity.

External students should be able to access a computer with the following [minimum standards](#) as advised by the University. All students should have access to email and the Internet via a computer running the latest versions of Internet web browsers such as Internet Explorer or Firefox.

Other program requirements

Students must maintain good standing in this program. Please refer to the [Academic Standing, Progression and Exclusion Procedure](#).
