Program aims

The Master of IT Innovation is a program that enable students to acquire knowledge and skills, and project management experience in IT innovation. The program will provide students with contemporary skills including data mining, big data analytics, cloud computing, Internet of Things, FinTech, and enterprise planning. The 4-unit capstone project is a full semester course providing students with strong project management skills comparable to industry practice.

Program objectives

On completion of this program, students should be able to:

- Display an advanced and integrated IT Innovation specific knowledge, including contemporary and emerging theories and concepts.
- Critically examine, analyse, and articulate IT Innovation skills to business scenarios.
- Effectively work in a team environment leading and contributing to team projects.
- Employ a range of oral, written and digital literacies to transmit complex knowledge in professional and scholarly contexts to a diverse audience.
- Identify, interpret and evaluate major issues in a range of contemporary business information technology areas.
- Develop innovative solutions to problems using current and emerging technologies.
- Apply principles of integrity and display ethical behaviour in accordance with academic, industry and professional standards.

Australian Qualifications Framework

The Australian Qualifications Framework (AQF) is a single national, comprehensive system of qualifications offered by higher education institutions (including universities), vocational education and training institutions and secondary schools. Each AQF qualification has a set of descriptors which define the type and complexity

of knowledge, skills and application of knowledge and skills that a graduate who has been awarded that qualification has attained, and the typical volume of learning associated with that qualification type.

This program is at AQF Qualification Level 09. Graduates at this level will have specialised knowledge and skills for research, and/or professional practice and/or further learning.

The full set of levels criteria and qualification type descriptors can be found by visiting www.aqf.edu.au.

Admission requirements

To be eligible for admission, applicants must satisfy the following requirements:

- Completion of a three-year bachelor degree in the area of ICT, or equivalent, from an Australian university, **and** a minimum of two years' professional work experience in IT or Management, or equivalent.
- English Language Proficiency requirements for Category 2.

All students are required to satisfy the applicable [English language requirements](#).

If students do not meet the English language requirements they may apply to study a University-approved [English language program](#). On successful completion of the English language program, students may be admitted to an award program.

Program fees

Domestic full fee paying place

Domestic full fee paying places are funded entirely through the full fees paid by the student. Full fees vary depending on the courses that are taken. Students are able to calculate the fees for a particular course via the [Course Fee Finder](#).

Domestic full fee paying students may be eligible to defer their fees through a Government loan called [FEE-HELP19.334 Tm\(FEE-\)Tj07191 438.203 fees paid by theno](#)

Exit points

A student who chooses not to complete or who does not maintain good standing in this program will be permitted to exit with a lesser qualification as set out below, provided that they have met the requirements of that program*.

- A student who successfully completes 4 foundation core courses may, upon application, exit with the Graduate Certificate of IT Innovation qualification.
- A student who successfully completes 8 courses (4 foundation core plus any other four courses offered
