### Professional accreditation

The Master of Information Systems program is accredited at professional level by the [Australian Computer Society](#) (ACS) and, through the Seoul Accord is recognised in other countries. The Seoul Accord is a multi-lateral agreement that allows ACS accreditation to be recognised globally. This means that graduates from this program will have their degree recognised by other countries who are members of the Accord.

### Program aims

The Master of Information Systems is a professionally-oriented program that provides university graduates with the opportunity to acquire an information systems qualification. The program comprises 16 courses.

### Program objectives

The Master of Information Systems aims to produce graduates who are able to:

- (1) Identify and analyse legal, security and privacy issues typically encountered in working as an IT professional.
- (2) Apply sound judgment in responding to important ethical, legal, security and privacy issues that would be encountered in working as an IT professional.
- (3) Plan and evaluate strategies to enhance the chances of leading successful entrepreneurial endeavours and organisational innovation using independent and well-developed judgement.
- (4) Critically analyse then synthesise complex scenarios to solve real-world problems related to the use and application of information technology.
- (5) Evaluate appropriate research methodologies to help identify, collect, analyse and manage a range of information technology issues.
- (6) Communicate professionally and effectively in written and verbal communication to relevant stakeholders.
- (7) Critically analyse ethical issues in a range of situations that confront IT professionals when called to make ethically appropriate decisions.

(8) Interact and collaborate effectively with others in teamwork tasks in a range of settings.

### **Australian Qualifications Framework**

The Australian Qualifications Framework (AQF) is a single national, comprehensive system of qualifications offered by higher education institutions (including universities), vocational education and training institutions and secondary schools. Each AQF qualification has a set of descriptors which define the type and complexity of knowledge, skills and application of knowledge and skills that a graduate who has been awarded that qualification has attained, and the typical volume of learning associated with that qualification type.

This program is at AQF Qualification Level 09. Graduates at this level will have specialised knowledge and skills for research, and/or professional practice and/or further learning.

The full set of levels criteria and qualification type descriptors can be found by visiting [www.aqf.edu.au](http://www.aqf.edu.au).

### **Admission requirements**

To be eligible for admission, applicants must satisfy the following requirements:

- Completion of an Australian university Bachelor degree, or equivalent.
